

1) Testimonial

We had the opportunity to partner with MMF in 2022-23 to implement an integrated rural development program in Magadi Taluk of Ramanagara district, Karnataka.

We could sense right from the time MMF joined us in visiting every identified school and village – that MMF had true interest in bringing about a positive change in the lives of the underserved. It was a positive collaboration with professional interactions that resulted in project implementation as per schedule and budget.

It was heart-warming for all of us to see the smiles of school children and head mistress/master as the sanitary and the seating facilities were inaugurated and made available for them. Not to mention the happiness on the faces of village women when clean, pure water came out of the newly installed RO systems.

We thank MMF for the opportunity given to make a small but definite change in health and sanitary conditions in schools and villages.
